

The Trichoptera list is taken from the very important paper: Morse, J.E. 1993. A checklist of the Trichoptera of North America, including Greenland and Mexico. *Transactions of the American Entomological Society*, 119:47-93. The list was modified by the addition of generic synonymies, the reversion to original orthography for the valid species group names, and the elimination of the purely Mexican species.

ALTERNATIVE FAMILY NAMES

The purpose of this section is to list some family names the user might encounter in the Trichoptera. This list is not an exhaustive compilation of family group names, but is included for the convenience of the users of the check list. The abbreviation (not NA) stands for not North America, ie. the family is not found north of the US-Mexican border.
