SYRPHIDAE

This family has been checked against a manuscript catalog of the Syrphidae of North America provided by Dr. F.C. Thompson. This manuscript catalog contains a wealth of new synonymies, new species, new combinations, and range extensions. None of this new information has been incorporated into this list because it has not yet been published. However the manuscript was extremely useful in checking original spellings and correcting errors in the original version compiled from the literature. The compilers of *Nomina Insecta Nearctica* are extremely grateful to Dr. Thompson for the use of his unpublished manuscript.
