

ODONATA

ROSSER W. GARRISON
RESEARCH ASSOCIATE
NATURAL HISTORY MUSEUM OF LOS ANGELES COUNTY
900 EXPOSITION BOULEVARD
LOS ANGELES, CALIFORNIA 90007

INTRODUCTION

This list includes all described Odonata of North America north of the Mexican border. Species occurring in the Antilles and Bahamas are considered to be Neotropical and are not included. Species misidentifications are not included. I have used the following sources:

- Kirby, W.F. 1890. **A synonymic catalogue of Neuroptera Odonata, or dragonflies.** Gurney and Jackson, London, ix + 202 pp.
- Muttkowski, R.A. 1910. **Catalogue of the Odonata of North America.** Bull. Publ. Mus. Milwaukee, 1(1):1-207.
- Paulson, D.R. 1969. **The Odonata of North and Middle America.** (Unpublished list).
- Paulson, D.R. 1977. Odonata *in* **Biota Acuatica de Sudamerica Austral**, S.H. Hurlbert, ed., San Diego State University, 170-184.
- Paulson, D.R. 1982. Odonata *in* **Aquatic Biota of Mexico, Central America and the West Indies.** H.H. Hurlbert and A. Villalobos-Figueroa, eds. San Diego State Univ., San Diego.
- Paulson, D.R. 1983. **Working list of the Odonata of South America.** (Unpublished list).
- Davies, D.A.L. and R Tobin. 1984. **The dragonflies of the world: a systematic list of the extant species of Odonata. Vol. 1. Zygoptera, Anisozygoptera.** Societas Internationalis Odonatologica Rapid Comm. (Suppl.) 3.
- Davies, D.A.L. and P. Tobin. 1985. **The dragonflies of the world: a systematic list of the extant species of Odonata. Vol. 2. Anisoptera.** Societas Internationalis Odonatologica Rapid Comm. (Suppl.) 5.
- Tsuda, Shigeru. 1986. **A distributional list of world Odonata. Preliminary edition.** Privately published. Osaka.
- Tsuda, Shigeru. 1991. **A distributional list of world Odonata.** Privately published. Osaka. [Note: This is the revised edition of the 1986 work cited above; a review of this work can be found in *Argia*: 1991, Vol. 3 No. 1: 23-24.]
- Bridges, Charles A. 1994. **Catalogue of the family-group, genus-group and species group names of the Odonata of the world (third edition).** Privately published by the author (now deceased) [Note: The first and second editions of this work appeared on 15 June

1991 and 1 February 1993, respectively. The first edition was reviewed by Garrison in *Argia*: 1991, Vol. 3 No. 1: 23-24. The second and third editions incorporated corrections and additions brought to the author's attention. The third edition has a new section, Part XIII, which includes figures of wings of almost all genera of Odonata.]

This list generally reflects current taxonomic views. I have listed all subgenera as synonyms although several are considered as valid subgenera or even genera by some workers. I have sent several versions of the list to the following Odonatists, who have freely given their advice, opinions, and constructive criticisms: G. Bick (Florida), C. Cook (Kentucky), J. Daigle (Florida), J. De Marmels (Venezuela), T. Donnelly (New York), S. Dunkle (Florida), K. Tennessen (Alabama), S. Tsuda (Japan).

Problems have confronted me for correct dates and authorship of various taxa. The Hagen/Seelys authorship controversy has been particularly troublesome; and I have decided on status by examining each original description by these two authors. Philippe Machet, of Saint-Cloud, France, has been particularly helpful in providing correct dates for certain poorly known published taxa described by Blanchard and others.

I owe much appreciation to the late Mr. Charles Bridges, of the University of Illinois at Urbana-Champaign, who corresponded with me over the years regarding the status of many New World Odonata name changes; he provided me with much help during the evolution of this list. To Don Frack of Covina, California, I owe a special debt. He provided me with a DBASE program, TAXON, which made the present list possible. My wife, Jo, who has always helped me over the years, helped with the data input.

ALTERNATIVE FAMILY NAMES

The purpose of this section is to list some alternative family names the user might encounter in the Odonata. This list is not an exhaustive list of family group names, but is only included for the convenience of the users of the check list. The abbreviation (not NA) stands for not North American, i.e. the family is not found in the Nearctic region north of the Mexican border.

Aeshnidae

Aeschnidae (see Aeshnidae)

Agrionidae (see Calopterygidae)

(Amphipterygidae not NA)

Argiidae (see Calopterygidae)

(Austropetaliidae not NA)**Calopterygidae****(Chlorocyphidae not NA)****Coenagrionidae**

Cordulegasteridae (see Cordulegastridae)

Cordulegastridae**Corduliidae****(Dicteriadidae not NA)****(Epiophlebiidae not NA)****(Euphaeidae not NA)****Gomphidae****(Hemiphlebiidae not NA)****(Isostictidae not NA)****Lestidae****(Lestoideidae not NA)****Libellulidae**

Macrodiplactidae (see Libellulidae)

(Megapodagrionidae not NA)**(Neopetaliidae not NA)****(Perilestidae not NA)****Petaluridae****(Platycnemididae not NA)****Platystictidae****(Polythoridae not NA)****Protoneuridae****(Pseudolestidae not NA)****(Pseudostigmatidae not NA)**

Pueliidae (see Coenagrionidae)

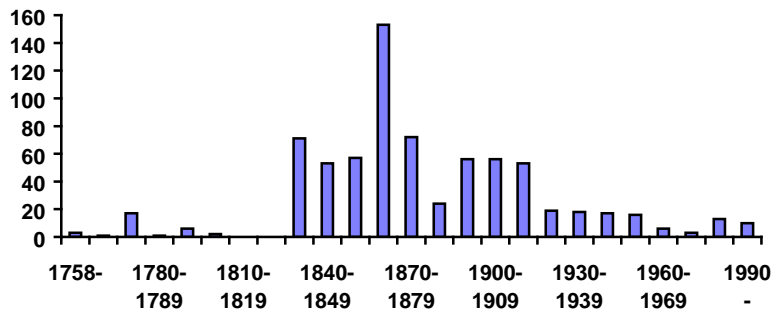

(Synlestidae not NA)

STATISTICS

This section contains some raw statistics without comment. A list of the species group names proposed by decade is listed in the table below followed by a graph of the numbers. Allowance must be made in interpreting the graph for the truncated decades at the beginning and end of the graph. The tables on the following page are a break down of the number of valid species and names by family.

Species group names (valid and synonymous) described by decade.

CLASSIFICATION: ODONATA

The classification adopted here, with the exception of the Gomphidae, is largely traditional and is based primarily on: Fraser (1957. **A reclassification of the Order Odonata**. Royal Zoological Society of New South Wales, 133pp). The classification of the Gomphidae follows: Carle (1986. The classification, phylogeny and biogeography of the Gomphidae (Anisoptera). I. Classification. *Odonatologica* 15(3): 275-326). Parts of the classification are unsatisfactory and phylogenetic studies will alter the classification considerably. Such a new classification has recently been proposed by Bechly (1996. Morphologische Untersuchungen am Flügelgeäder der rezenten Libeeren und deren Stammgruppenvertreter (insecta; Pterygota; Odonata). *Petalura*, spec.-vol. 2: 402 pp., 111 figs., 3 tabs. [revised second edition with an English appendix: "Phylogenetic System and List of Synapomorphies"]). Drastic changes in the higher classification are advocated. An abstracted English version (The phylogenetic system of fossil and recent Odonatoptera).is available at the following web site:

<http://members.aol.com/odonatadat/phylogeny/bechly.htm>

SUBORDER ZYGOPTERA Selys, 1854

CALOPTERYGIDAE Selys, 1850

Calopteryginae Selys, 1850: *Calopteryx*.

Hetaerinae Selys, 1853: *Hetaerina*.

LESTIDAE Calvert, 1901

Lestinae Calvert, 1901: *Archilestes*, *Lestes*.

PLATYSTICTIDAE Tillyard & Fraser, 1938

Palaemnematinae Tillyard & Fraser, 1938: *Palaemnema*.

PROTONEURIDAE Tillyard, 1917

Protoneurinae Tillyard, 1917: *Neoneura*, *Protoneura*.

COENAGRIONIDAE Kirby, 1890

Argiinae Tillyard, 1917: *Argia*.

Coenagrioninae Kirby, 1890: *Chromagrion*, *Coenagrion*, *Nehalennia*, *Neoerythromma*.

Ischnurinae Fraser, 1957: *Acanthagrion*, *Amphiagrion*, *Enallagma*, *Hesperagrion*, *Ischnura*, *Zoniagrion*.

Pseudagrioninae Tillyard, 1917: *Apanisagrion*, *Telebasis*.

SUBORDER ANISOPTERA Selys, 1854

PETALURIDAE Tillyard, 1917

Petalurinae Tillyard, 1917: *Tachopteryx*.

Tanypteryginae Davies & Tobin, 1985: *Tanypteryx*.

AESHNIDAE Rambur, 1842

Aeshninae Rambur, 1842: *Aeshna*, *Anax Coryphaeschna*, *Gynacantha*, *Remartinia*, *Triacanthagyna*.

Brachytroninae Tillyard, 1917: *Basiaeschna*, *Boyeria*, *Epiaeschna*, *Gomphaeschna*, *Nasiaeschna*, *Oploniaeschna*.

GOMPHIDAE Rambur, 1842

Hageniinae Davies & Tobin, 1985: *Hagenius*.

Octogomphinae Carle & Cook, 1984: *Lanthus*, *Octogomphus*, *Stylogomphus*.

Gomphinae Rambur, 1842: *Arigomphus*, *Dromogomphus*, *Gomphus*, *Stylurus*.

Onychogomphinae Chao, 1984: *Erpetogomphus*, *Ophiogomphus*.

Lindeniinae Selys, 1854: *Aphylla*, *Phyllogomphoides*, *Progomphus*.

CORDULEGASTRIDAE Tillyard, 1917

Cordulegastrinae Tillyard, 1917: *Cordulegaster*.

CORDULIIDAE Kirby, 1890

Macromiinae Tillyard, 1917: *Didymops*, *Macromia*.

Corduliinae Kirby, 1890: *Cordulia*, *Dorocordulia*, *Epithecina*, *Helocordulia*, *Neurocordulia*, *Somatochlora*, *Williamsonia*.

LIBELLULIDAE Rambur, 1842

Brachydiplactinae Tillyard, 1917: *Micrathyria*, *Nannothemis*.

Leucorrhiniinae Tillyard, 1917: *Brachymesia*, *Celithemis*, *Leucorrhinia*.

Libellulinae Rambur, 1842: *Cannaphila*, *Libellula*, *Orthemis*.

Sympetrinae Tillyard, 1917: *Crocothemis*, *Erythemis*, *Erythrodiplax*, *Pachydiplax*, *Pseudoleon*, *Sympetrum*.

Trithemistinae Tillyard, 1917: *Brechmorhoga*, *Dythemis*, *Macrothemis*, *Paltothemis*.

Palpopleurinae Tillyard, 1917: *Perithemis*.

Trameinae Tillyard, 1917: *Idiataphe*, *Miathyria*, *Pantala*, *Tauriphila*, *Tholymis*, *Tramea*.

Urothemistinae Lieftinck, 1954: *Macrodiplax*.

Annotations and comments on the Check List

General Comments:

1. Date of publication of Hagen and Selys, *Monographie des Gomphines*: I follow Calvert (1905. *Biologia Centrali Americana*: 148), who states in a footnote: "It is usual to quote the "Monographie des Gomphines" with the date 1857, as is done by Kirby [1890] for example, and "November 1857" is, indeed, that which appears on the title page of the volume; but the original paper cover bore the date "Mai 1858," which has usually not been preserved in bound copies. Moreover, plates xx-xxii are dated at the bottom as having been drawn in 1858." Cowley (1937. *J. Soc. Bibliography Nat. Hist.* 1(3):73-74) opted for 1857, but further evidence of an 1858 publication date was brought to my attention by P. Machtet. In the "appendice" (page 651 [391 separate]) is stated: "Some circumstances having put off the conclusions of this volume, considerable and rather numerous materials have reached us *during printing* [italics mine]. One comes from a trip made by H. Hagen to London in 1857; others from a shipment of species from Texas, made by the Smithsonian Institution."
2. I give synonyms, *nomina nuda*, etc., only for New World taxa for Holarctic species such as *Enallagma cyathigerum* and *Libellula quadrimaculata*. The single exception is *Crocothemis servilia servilia*, an Old World species recently introduced into peninsular Florida.

Specific Comments:

1. *Aeshna clepsydra* with synonyms *arundinacea* Selys 1872 and *maxima* Heikal in Hisinger 1861. The latter two names have often been included as synonyms of *A. clepsydra*. My reason for their deletion is based on a footnote by Walker to Muttkowski (1910. *Cat. Odon.*: 109):

"Walker in litteris Aug. 14, 1909: 'The synonyms given by you do not belong to the true clepsydra. *A. arundinacea* and *maxima* I have not seen: It is very probable that the first at least is a good species.'" And,

"Walker in litteris, Sept. 24, 1909: 'Some of the references ... do not refer to true clepsydra...I am quite sure arundinacea is not clepsydra, but as I have not seen the type it is probably best to let it stand as a synonym of the latter on the authority of Martin'."

Curiously, I can find no mention of these little-used names in Walker's 1912 monograph. The original description of *arundinacea* is based on a female from "Irkutzk", and Selys states it is similar to Siberian *A. juncea*. According to Dr. Matti Hämäläinen, University of Helsinki, in a letter to me, *A. maxima* is a junior synonym of the Old World *Aeshna crenata* Hagen. I have found no records of *clepsydra* occurring anywhere in the Palearctic, and I strongly suspect that *arundinacea* refers to a species other than the North American *clepsydra*.

2. *Triacanthagyna obscuripennis* Blanchard. Williamson, in his monograph of this genus (1923. Univ. Mich. Mus. Zool. Misc. Publ. 9:1-80), believed this to be a possible synonym of *T. septima*; but P. Machet believes, after examining the short description and figure by Blanchard, that it may be of the *trifida* group, and possibly a synonym of one of the later described species. Should this be the case (if the type is found), I would not be in favor of using this name, I list *obscuripennis* as a distinct species, but it should, in my opinion, be considered a *nomen dubium* or a *nomen obletum*, if and when its status is determined.
3. *Gomphus* complex. The status of the various genera/subgenera of North American entities has not been satisfactorily resolved. I have not studied the problems, but have largely followed the advice of others. In this list, I do not recognize the subgenus *Stenogomphurus* nor do I accept elevation of the subgenus *Gomphurus* to generic status since there appears to be questions of their validity and changes in the literature as follows: Carle (Carle, F. L. 1986. The classification, phylogeny and biogeography of the Gomphidae (Anisoptera). I. Classification. Odonatologica 15(3): 275-326.) proposed the subgenus *Stenogomphurus* (type species: *Gomphus consanguis*) under the large genus *Gomphus*. However, *G. consanguis* has always been included under the subgenus *Gomphurus* of *Gomphus*. Carle (1986) also raises *Gomphurus* to generic status, but does not key or diagnose between *Gomphus* and *Gomphurus*. He does not explain his reason for removing *G. consanguis* from *Gomphus* and placing it in the new subgenus, *Stenogomphurus*. It would appear that he never diagnosed *Stenogomphurus* from *Gomphus*. Carle (1986) does not discuss the relationship between *Gomphurus* and *Gomphus sensu lato*, and gives no reason for the elevation of *Gomphurus* to generic status. Therefore, I will continue to treat *Gomphurus* as a subgenus of *Gomphus*. *Phanogomphus* is also not recognized in this list for the following reason: Carle (Carle, F. L. 1986. The classification, phylogeny and biogeography of the Gomphidae (Anisoptera). I. Classification. Odonatologica 15(3): 275-326.) proposed the subgenus *Phanogomphus* (type species: *Gomphus minutus* Rambur), which Carle & May (Carle, F. L. & M. L. May. 1987. *Gomphus (Phanogomphus) westfalli* spec. nov. from the gulf coast of Florida (Anisoptera: Gomphidae). Odonatologica 16(1): 67-75) later expanded to include other species of *Gomphus (Gomphus)*. Many Odonatists, including myself, consider *Phanogomphus* a subjective synonym of the type species of *Gomphus*, *G. vulgatissimus* (Linnaeus). I treat *Arigomphus* as a separate genus from *Gomphus*. *Hylogomphus* is considered a synonym of *Gomphus (Gomphus)*, following Carle (1986). I realize that this arrangement will probably not be satisfactory to many, but a final resolution may not be achieved for several years.

Carle (*in*. May, M and F. Carle, 1996. An annotated list of the Odonata of New Jersey, with an appendix on nomenclature in the genus Gomphus. Bulletin of Odonatology 4(1):1-35) has defended his actions regarding the introduction of the names discussed above. That such an appendix was written and the acknowledgement that several workers were in doubt about the proper introduction of new taxa and changes illustrates, in my opinion, the continued confusion by this author's actions.

4. **CORDULEGASTRIDAE:** In a recent paper, 1992. Revision der Cordulegastridae. 1. Entwurf einer neuen Klassifizierung der Familie (Odonata: Anisoptera). Opuscula Zoologica Fluminensia 96:1-18, H. Lohmann has performed a cladistic analysis on the family, with the result that our eight species are allocated to six genera as follows:

Archegaster (gen. nov.)
sayi

Kalyptogaster (gen. nov.)
erronea (with synonym *fasciata*)
Lauragaster (gen. nov.)
diadema
dorsalis
Pangaegaster (gen. nov.)
maculata
Taeniogaster (Selys, 1854)
obliquua
Zoraena Kirby 1890
bilineata
diastatops

While I admire the treatment of this family by Lohmann, I do not think it serves science to split our American species from one into six genera. Carle, in an earlier paper (1983. Ann. Entomol. Soc. Amer. 76(1):61-68) also recognized *Zoraena* and *Taeniogaster*, but his divisions do not seem to have been followed by Odonatists in this country. I still consider all of our species in one genus, *Cordulegaster*. However, I include the above data for those who wish to make changes.

5. Both Dr. Ken Tennessen and Mr. Carl Cook inform me that *Neurocordulia clara* Muttkowski is more closely related to *N. molesta*, although Cook believes *N. clara* a good species. I have treated it as a synonym of *N. molesta*.
6. Ken Tennessen (in litt.) informs me that he believes *Epitheca (Tetragoneuria) williamsoni* Muttkowski to be a probable synonym of *E. costalis*.
7. *Erythrodiplax connata* complex. I include some nomenclatorial changes which are not in accord with Borror 1942 (Ohio State Univ. Contr. Zool. Entomol., No. 4). Other Odonatists and I treat *E. minuscula* and *E. fusca* as separate species based on an absence of intergrades with *E. connata* (despite the fact that Borror reports such specimens in his monograph)..
8. *Libellula bifasciata* Blanchard. The type for this old, forgotten name was discovered by Lieftinck to be *L. semifasciata*, not *L. pulchella*, according to Dr. M.J. Westfall, Jr. (pers. comm.). As with *Triacanthagyna obscuripennis*, I think it best to consider *L. bifasciata* a *nomen obletum*.

Status of specific names not mentioned in this list:

1. *Enallagma optimolocus* Miller & Ivaie, 1995 (Proceedings of the Entomological Society of Washington 97(4):833-838). I reviewed an earlier draft of the manuscript, have one paratype in my collection and also examined a specimen supposedly of this species from Oregon (Crook County, South Fork Crooked River, nr. confluence with North Fork, 10 Aug. 1994, Ken J. Tennessen, collector). I strongly believe that this taxon is only a hybrid between *E. anna* and *E. carunculatum* for the following reasons: No females of *E. optimolocus* have been collected and this "species" has always been collected where the two parental types occur. Examination of two paratypes and the Oregon male, the last kindly loaned to me by Dr. Ken Tennessen, show appendage morphology intermediate between the parental types. Hybridization between other *Enallagma* species is known and hybrids intermediate in appendage morphology have been produced in the laboratory and occur in nature for two closely related species, *Ischnura denticollis* and *I. gemina* (Leong, J. M. & J. E. Hafernick, Jr. 1992. Hybridization between two damselfly species (Odonata: Coenagrionidae): morphometric and genitalic differentiation. Annals of the Entomological Society of America 85(6): 662-670).
2. *Gomphus williamsoni* Muttkowski, 1910. This name based on only one known specimen, is almost certainly a natural hybrid between *Gomphus (Gomphus) graslinellus* and *Gomphus (Gomphus) lividus*.
3. *Macromia wabashensis* Williamson, 1909. Until recently, consensus among most U. S. Odonatists was to treat *Macromia wabashensis* as a synonym or color form (polymorph) of *M. taeniolata*. Secondary genitalia including the shape of the head of the hamule for *M. pacifica*, *M. wabashensis*, and *M. taeniolata* is similar.

Williamson (1909 Proc. U. S. Nat. Museum 37:369-398.) reports captures of *M. wabashensis* with *Macromia taeniolata* and *M. pacifica*, which suggests the possibility that *M. wabashensis* is a hybrid between *M. pacifica* and *M. taeniolata*. Other mostly non-published data suggest the occurrence of both *M. pacifica* and *M. taeniolata* wherever *M. wabashensis* has been collected. Like Dunkle (1995. Conservation of dragonflies (Odonata) and their habitats in North America. page 23 in Corbet, P. S., S. W. Dunkle, H. Ubukata, eds. Proceedings of the International symposium on the conservation of dragonflies and their habitats. Japanese Society for the Preservation of Birds, Kushiro, xii + 1-70), I am doubtful of according species status to *M. wabashensis*. Acquisition of more specimens and the discovery of the female may help to determine its true status. I suggest that multivariate morphometric analyses of available specimens of *M. wabashensis* and samples of *M. taeniolata* and *M. pacifica* from zones of sympatry with *M. wabashensis* may provide evidence about whether *M. wabashensis* is a hybrid.

 Enallagma vesperum Calvert 1919 (Enallagma)
Enallagma laurenti Calvert 1919 Syn.
 Enallagma weewa Byers 1927 (Enallagma)

Hesperagrion Calvert 1902

Hesperagrion heterodoxum Selys 1868 (Amphiagrion)
Agrion flavescens Selys 1868 Syn.

Ischnura Charpentier 1840

Anomalagrion Selys 1857 Syn.
Micronympha Kirby 1890 Syn.
Celaenura Kennedy 1917 Syn.
Anomalura Kennedy 1920 Syn.
Nanosura Kennedy 1920 Syn.
Bedfordia Mumford 1942 Homo.
Ischnuridia Donnelly 1965 Syn.

Ischnura barberi Currie 1903 (Ischnura)

Ischnura utahensis Muttkowski 1910 Syn.
 Ischnura cervula Selys 1876 (Ischnura)
 Ischnura damula Calvert 1902 (Ischnura)
 Ischnura demorsum Hagen 1861 (Agrion)
 Ischnura denticollis Burmeister 1839 (Agrion)
Ischnura exstriata Calvert 1895 Syn.
 Ischnura erratica Calvert 1895 (Ischnura)
 Ischnura gemina Kennedy 1917 (Celaenura)
 Ischnura hastata Say 1839 (Agrion)
Agrion anomalum Rambur 1842 Syn.
Agrion venerinotata Haldeman 1844 Syn.
 Ischnura kellicotti Williamson 1898 (Ischnura)
 Ischnura perparva Selys 1876 (Ischnura)
 Ischnura positum Hagen 1861 (Agrion)
 Ischnura prognatum Hagen 1861 (Agrion)
 Ischnura ramburii Selys 1850 (Agrion)
Ischnura tuberculata Selys 1857 Syn.
Agrion aurantiaca Hagen 1861 Syn.
Agrion credulum Hagen 1861 Syn.
Agrion defixum Hagen 1861 Syn.
Agrion expertum Hagen 1861 Unav.
Agrion iners Hagen 1861 Syn.
 Ischnura verticalis Say 1839 (Agrion)
Agrion canadense Provancher 1876 Syn.

Nehalennia Selys 1850

Argiallagma Selys 1876 Unav.
Argiallagma Calvert 1907 Syn.

Nehalennia gracilis Morse 1895 (Nehalennia)
 Nehalennia integricolis Calvert 1913 (Nehalennia)
 Nehalennia irene Hagen 1861 (Agrion)
Nehalennia carolott Butler 1914 Syn.
 Nehalennia pallidula Calvert 1913 (Nehalennia)

Neoerythromma Kennedy 1920

Neoerythromma cultellatum Selys 1876 (Enallagma)

Telebasis Selys 1865

Erythragrion Selys 1876 Syn.

Telebasis byersi Westfall 1957 (Telebasis)
 Telebasis salvum Hagen 1861 (Agrion)
Telebasis boucardi Selys 1868 Syn.

Zoniagrion Kennedy 1917

Zoniagrion exclamationis Selys 1876 (Agrion)

CORDULEGASTRIDAE

Cordulegaster Leach 1815

Taeniogaster Selys 1854 Syn.
Thecagaster Selys 1854 Syn.
Thecaphora Charpentier 1840 Syn.
Thecaphora Selys 1854 Homo.
Zoraena Kirby 1890 Syn.
Kuldanagaster Yousuf and Yunus 1974 Syn.
Archeagaster Lohmann 1992 Syn.
Kalyptogaster Lohmann 1992 Syn.

Lauragaster Lohmann 1992 Syn.
Pangaeagaster Lohmann 1992 Syn.
Sonjagaster Lohmann 1992 Syn.

Cordulegaster bilineata Carle 1983 (Zoraena)
 Cordulegaster diadema Selys 1868 (Cordulegaster)
 Cordulegaster diastatops Selys 1854 (Thecaphora)
Cordulegaster lateralis Scudder 1866 Syn.
 Cordulegaster dorsalis Hagen 1858 (Cordulegaster)
Cordulegaster deserticola Cruden 1969 Syn. (subspecies)
 Cordulegaster erroneus Hagen 1878 (Cordulegaster)
 Cordulegaster maculatus Selys 1854 (Cordulegaster)
 Cordulegaster obliqua Say 1839 (Aeschna)
Cordulegaster fasciatus Rambur 1842 Syn. (subspecies)
 Cordulegaster sayi Selys 1854 (Cordulegaster)

CORDULIIDAE

Cordulia Leach 1815

Cordulia shurtleffi Scudder 1866 (Cordulia)
Cordulia bifurcata Hagen 1861 Unav.

Didymops Rambur 1842

Didymops floridensis Davis 1921 (Didymops)
 Didymops transversa Say 1839 (Libellula)
Epopthalmia cinnamomea Burmeister 1839 Syn.
Didymops servillei Rambur 1842 Syn.

Dorocordulia Needham 1901

Dorocordulia libera Selys 1871 (Cordulia)
 Dorocordulia lepida Hagen 1871 (Cordulia)

Epitheca Burmeister 1839

Tetragoneuria Hagen 1861 Syn.
Epicordulia Selys 1871 Syn.

Epitheca canis McLachlan 1886 (Epitheca)
 Epitheca costalis Selys 1871 (Cordulia)
Epitheca williamsoni Muttkowski 1911 Syn.
 Epitheca cynosura Say 1839 (Libellula)
Libellula tomentosa Fabricius 1775 Nomob.
Epopthalmia lateralis Burmeister 1839 Syn.
Cordulia complanata Rambur 1842 Syn.
Cordulia basiguttata Selys 1871 Syn.
Cordulia diffinis Selys 1871 Syn.
Epitheca simulans Muttkowski 1911 Syn.
 Epitheca petechialis Muttkowski 1911 (Epitheca)
 Epitheca princeps Hagen 1861 (Epitheca)
Cordulia regina Hagen 1871 Syn. (subspecies)
 Epitheca semiaqua Burmeister 1839 (Libellula)
Epitheca diffinis Hagen 1861 Unav.
Epitheca calverti Muttkowski 1915 Syn.
 Epitheca sepia Gloyd 1933 (Epitheca)
 Epitheca spinigera Selys 1871 (Epitheca)
Epitheca indistincta Morse 1895 Syn.
 Epitheca spinosa Hagen 1878 (Cordulia)
 Epitheca stella Williamson 1911 (Epitheca)

Helocordulia Needham 1901

Helocordulia selysii Hagen 1878 (Cordulia)
 Helocordulia uhleri Selys 1871 (Cordulia)

Macromia Rambur 1842

Phyllomacromia Selys 1878 Syn.
Pseudogomphus Kirby 1889 Syn.
Ceratopyga Nunney 1895 Syn.
Hylaeschna Sjöstedt 1900 Syn.

Macromia alleghaniensis Williamson 1909 (Macromia)
 Macromia annulata Hagen 1861 (Macromia)
Macromia caderita Needham 1950 Syn.
 Macromia illinoiensis Walsh 1862 (Macromia)
Epopthalmia georgina Selys 1878 Syn. (subspecies)
Macromia australensis Williamson 1909 Syn.
 Macromia magnifica McLachlan 1874 (Macromia)
Macromia rickeri Walker 1937 Syn.
 Macromia margarita Westfall 1947 (Macromia)
 Macromia pacifica Hagen 1861 (Macromia)
Macromia flavipennis Walsh 1862 Syn.
 Macromia taeniolata Rambur 1842 (Macromia)

Neurocordulia Selys 1871

Platycordulia Williamson 1908 Syn.

Neurocordulia alabamensis Hodges 1955 (Neurocordulia)
 Neurocordulia molesta Walsh 1863 (Cordulia)
Neurocordulia clara Muttkowski 1910 Syn.
 Neurocordulia obsoleta Say 1839 (Libellula)
Libellula polysticta Burmeister 1839 Syn.
 Neurocordulia virginienensis Davis 1927 (Neurocordulia)
 Neurocordulia xanthosoma Williamson 1908 (Platycordulia)
 Neurocordulia yamaskanensis Provancher 1875 (Aeshna)
Epitheca jamascarensis Hagen 1878 Syn.

Somatochlora Selys 1871

Chlorosoma Charpentier 1840 Homo.

Somatochlora albicincta Burmeister 1839 (Epopthalmia)
Cordulia eremita Scudder 1866 Syn.
Somatochlora massettensis Whitehouse 1941 Syn.
 Somatochlora brevicincta Robert 1954 (Somatochlora)
 Somatochlora calverti Williamson and Gloyd 1933 (Somatochlora)
 Somatochlora cingulata Selys 1871 (Epitheca)
 Somatochlora elongata Scudder 1866 (Cordulia)
Cordulia saturata Hagen 1861 Unav.
 Somatochlora ensigera Martin 1907 (Somatochlora)
Somatochlora charadraea Williamson 1907 Syn.
 Somatochlora filosa Hagen 1861 (Cordulia)
 Somatochlora forcipata Scudder 1866 (Cordulia)
Cordulia chalybea Hagen 1861 Unav.
 Somatochlora franklini Selys 1878 (Epitheca)
Somatochlora macrotota Williamson 1909 Syn.
 Somatochlora georgiana Walker 1925 (Somatochlora)
 Somatochlora hineana Williamson 1931 (Somatochlora)
 Somatochlora hudsonica Hagen 1871 (Epitheca)
 Somatochlora incurvata Walker 1918 (Somatochlora)
 Somatochlora kennedyi Walker 1918 (Somatochlora)
 Somatochlora linearis Hagen 1861 (Cordulia)
Epitheca procera Selys 1871 Syn.
Somatochlora lateralis Needham 1901 Missp.
 Somatochlora margarita Donnelly 1962 (Somatochlora)
 Somatochlora minor Calvert 1898 (Somatochlora)
 Somatochlora ozarkensis Bird 1933 (Somatochlora)
 Somatochlora provocans Calvert 1903 (Somatochlora)

Somatochlora sahlbergi Trybom 1889 (Somatochlora)
Somatochlora walkeri Kennedy 1917 Syn.
 Somatochlora semicircularis Selys 1871 (Epiteca)
Epiteca nasalis Selys 1874 Syn.
 Somatochlora septentrionalis Hagen 1861 (Cordulia)
Cordulia richardsoni Hagen 1861 Unav.
 Somatochlora tenebrosa Say 1839 (Libellula)
Cordulia tenebrica Hagen 1861 Unav.
 Somatochlora walshii Scudder 1866 (Cordulia)
 Somatochlora whitehousei Walker 1925 (Somatochlora)
 Somatochlora williamsoni Walker 1907 (Somatochlora)

Williamsonia Davis 1913

Williamsonia fletcheri Williamson 1923 (Williamsonia)
Diplax vacua Hagen 1867 Unav.
 Williamsonia lintneri Hagen 1878 (Cordulia)

GOMPHIDAE

Aphylla Selys 1854

Aphylla angustifolia Garrison 1986 (Aphylla)
 Aphylla protracta Hagen 1859 (Cyclophylla)
Gomphoides ambigua Selys 1873 Syn.
 Aphylla williamsoni Gloyd 1936 (Gomphoides)

Arigomphus Needham 1897

Orcus Needham 1897 Homo.

Arigomphus cornutus Tough 1900 (Gomphus)
Gomphus whedoni Muttkowski 1913 Syn.
 Arigomphus furcifer Hagen 1878 (Gomphus)
 Arigomphus lentulus Needham 1902 (Gomphus)
Gomphus subapicalis Williamson 1914 Syn.
 Arigomphus maxwelli Ferguson 1950 (Gomphus)
 Arigomphus pallidus Rambur 1842 (Gomphus)
Gomphus pilipes Hagen 1858 Syn.
 Arigomphus submedianus Williamson 1914 (Gomphus)
 Arigomphus villosipes Selys 1854 (Gomphus)

Dromogomphus Selys 1854

Dromogomphus armatus Selys 1854 (Dromogomphus)
 Dromogomphus spinosus Selys 1854 (Dromogomphus)
 Dromogomphus spoliatus Hagen 1858 (Gomphus)

Erpetogomphus Selys 1858

Herpetogomphus Walsh 1862 Emend.
Calogomphus Carle 1992 Syn.
Erpetocyclops Carle 1992 Syn.

Erpetogomphus compositus Hagen 1858 (Erpetogomphus)
Erpetogomphus coluber Williamson and Williamson 1930 Syn.
 Erpetogomphus crotalinus Hagen 1854 (Ophiogomphus)
 Erpetogomphus designatus Hagen 1858 (Erpetogomphus)
 Erpetogomphus eutainia Calvert 1905 (Erpetogomphus)
Erpetogomphus diadophis Calvert 1905 Syn.
 Erpetogomphus heterodon Garrison 1994 (Erpetogomphus)
 Erpetogomphus lampropeletis Kennedy 1918 (Erpetogomphus)
Erpetogomphus natrix Williamson and Williamson 1930 Syn.
 (subspecies)

Gomphus Leach 1815

Thanatophora Selys 1850 Syn.
Gomphurus Needham 1901 Syn.
Hylogomphus Needham 1951 Unav.
Hylogomphus Needham and Westfall 1955 Syn.
Phanogomphus Carle 1986 Syn.
Stenogomphurus Carle 1986 Syn.

Gomphus abbreviatus Hagen 1878 (Gomphus)
 Gomphus adelphus Selys 1858 (Gomphus)
Gomphus brevis Hagen 1878 Syn.
 Gomphus apomyius Donnelly 1966 (Gomphus)
 Gomphus australis Needham 1897 (Arigomphus)
 Gomphus borealis Needham 1900 (Gomphus)
 Gomphus cavillaris Needham 1902 (Gomphus)
Gomphus brimleyi Muttkowski 1911 Syn.
 Gomphus consanguis Selys 1879 (Gomphus)
 Gomphus crassus Hagen 1878 (Gomphus)
Gomphus walshii Kellicott 1899 Syn.
 Gomphus descriptus Banks 1896 (Gomphus)
Gomphus argus Needham 1943 Syn.
Gomphus mortimer Needham 1943 Syn.
 Gomphus dilatatus Rambur 1842 (Gomphus)
 Gomphus diminutus Needham 1950 (Gomphus)
 Gomphus exilis Selys 1854 (Gomphus)
Gomphus flavocaudatus Walker 1940 Syn.
 Gomphus externus Hagen 1858 (Gomphus)
Gomphus consobrinus Walsh 1863 Syn.
 Gomphus fraterna Say 1839 (Aeshna)
Gomphus manitobanus Walker 1958 Syn. (subspecies)
 Gomphus geminatus Carle 1979 (Gomphus)
 Gomphus gonzalezi Dunkle 1992 (Gomphus)
 Gomphus graslinellus Walsh 1862 (Gomphus)
 Gomphus hodgesi Needham 1950 (Gomphus)
 Gomphus hybridus Williamson 1902 (Gomphus)
 Gomphus kurilis Hagen 1858 (Gomphus)
Gomphus confraternus Selys 1873 Syn.
Gomphus sobrinus Selys 1873 Syn.
Gomphus donneri Kennedy 1917 Syn.
 Gomphus lineatifrons Calvert 1921 (Gomphus)
 Gomphus lividus Selys 1854 (Gomphus)
Gomphus sordidus Hagen 1854 Syn.
Gomphus umbratus Needham 1897 Syn.
 Gomphus lynnae Paulson 1983 (Gomphus)
 Gomphus militaris Hagen 1858 (Gomphus)
 Gomphus minutus Rambur 1842 (Gomphus)
